Make Your Own Rhino Bookmark

To start with you need a square piece of paper, then you will need to turn it on its point. Fold the top point down to the bottom point (See diagram 1 and 2)

Next you need to fold the top layer of paper up to the top (See diagram 3). Once you have done this take the left corner and fold it down to the bottom point and do the same with the right side (See diagram 4)

Once you have done this you can fold the 2 points under the flap you have created (See diagram 5). You should be then left with your bookmark like diagram 6

The final step is to create the rhino face for your bookmark, to do this you can get a piece of paper and on there you will need to draw your rhino face. When you have drawn it out you can use some scissors to cut it out and then stick it on the front of your bookmark.

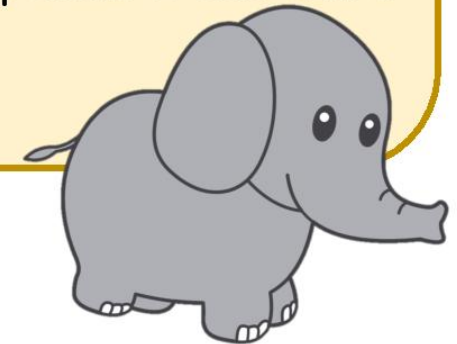

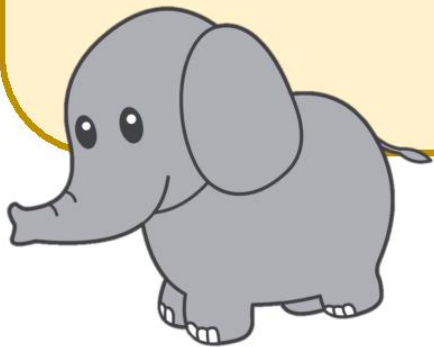

What you will need:

- Tissue Paper
- Regular paper
- Colouring pens or pencils
 - Glue
 - Scissors

Make your own tissue paper elephant

To start with you need to get a piece of paper and then use a pen or pencil to draw out your elephant shape on the paper, you can draw a whole elephant, or you can draw just its face if that's what you would like to do. Once you have done this its time to decorate with your tissue paper. You can use grey tissue paper if you want to make a traditional elephant or you can make it a different colour or even a rainbow, with your tissue paper you will want to tear bits and scrunch them up into little balls. Use your glue to then stick these pieces on to your elephant. You can use pens or pencils to add extra little details or design the background for your elephant.
