

What You Will Need:

- Cardboard
- Paint
- Scissors
- Something to use as the throwing balls

Ornament Christmas Tree Toss Game

To start making your tree toss game you first need to get a large piece of cardboard. On this piece of cardboard, you will need to draw a large Christmas tree, once you have drawn it you can use some paint to colour and decorate your tree. While you are waiting for the paint to dry you can begin to make the throwing objects, for this you could use festive balled up socks, balls that you can decorate or even old tree decorations you have that are plastic so they don't break. When your tree has dried draw 3 different sized hole son the tree that you can cut out to make the game, the smaller the hole the harder the game will be (make sure to ask for help when cutting out the holes). Finaly when you have finished it all you can then have a go at your game.
